More About Essential Oils

We are thrilled to be providing Target with their first range of essential oils and aroma products, proudly made right here in Australia.

Our essential oil *Destinations* Blends have been thoughtfully created to capture the spirit of some of the world's most-loved places, including Paris, Tuscany, Santorini and Australian beaches.

Each Destinations Blend combines essential oils that help to create the ambience of those special places, allowing you to relax, close your eyes and feel as though you've been transported to a magical new place, or take your mind back to special memories of exploration and discovery.

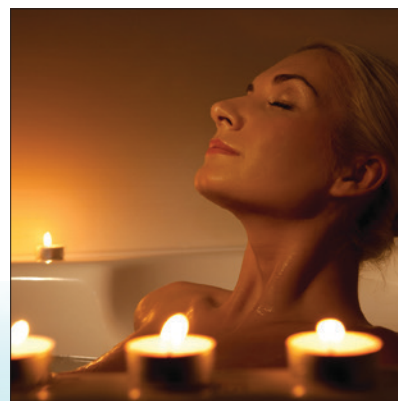

These multi-purpose essential oils can be added to a candle or electric vaporiser to disperse the relaxing scent in your space, but they can also be used in the following ways:

Shower: sprinkle 10-12 drops in the floor of your shower and let the beautiful scents wash over you.

Massage: add 5 drops to the massage oil of your choice for a luxurious experience.

Bath: add 10-12 drops to a full bath before immersing yourself.
